APHEX®

MAKING YOUR WORLD SOUND BETTER

a DWE ENTERTAINMENT Company

SELECT MODELS OF 2010 DEAN ACOUSTICS FEATURE APHEX ENHANCED PREAMPS!

WORLD FAMOUS STUDIO/LIVE ENHANCEMENT - EXCLUSIVELY FOR DEAN!

Turn Aphex "Enhance" switch
On & the guitar comes alive!

Aural Exciter - Optimized for Dean's new 2010 series Acoustic/Electric Guitars the Aural Exciter adds "air," "bite," "definition," "percussive attack" and better clarity by enhancing the natural harmonics of the sound. No other "Exciter" has the musicality of the true Aural Exciter found in our new Dean Acoustic/Electric guitars.

Big Bottom - The Aphex Big Bottom circuit dynamically enhances the low end by deepening and expanding the bass tones according to an adaptive process. It's not just an equalizer boost - it increases volume before feedback. The effect fattens the tone while it extends the guitars bass producing capability. The Aphex "brings out the box" and adds a warmer tone that makes our instrument sound bigger and fuller.
